Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:**

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- 2. Claims 1-23 and 25-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yeo for reasons of record.**
- 3. Applicant urges that the instant claims are not directed to foams but to a composition which is capable of foaming. However the term "foaming" is a verb which reads on a process of foaming which does not appear in the claimed composition claims. And if applicant intends for the claims to read on a foamable composition, such a composition is disclosed in the patent since patentee does in fact disclose the addition of his polymers of water. See for example cols. 3-6 of the patent and particularly col. 5 line 3 et. seq. with regard to instant claim 25.**

Art Unit: 1711

Applicant urges that since the composition of Yeo is concerned with a composition that falls apart in excess water which is contrary to the core purpose of the Yeo description. Attention is directed to the fact that since patentee does indicate that he has tested the polymer in water and has indicated the at a certain point in the polymer dilution with water it dissolves indicates that he at one point in his addition of the polymer to water the claimed (foamable) composition existed.

Thirdly, applicant argues that Yeo describes as suitable for his invention only those polymers having an LSCT of 25 degrees C. (col. 9, lines 26-28). However attention is directed to the fact such a temperature nevertheless reads on the claimed range but the gel points of the polymers employed are also within the claimed range (note col. 11 line 65 et.seq.).

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 1711

- 1. Determining the scope and contents of the prior art.**
- 2. Ascertaining the differences between the prior art and the claims at issue.**
- 3. Resolving the level of ordinary skill in the pertinent art.**
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.**

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
